

# MINIMAJOR & MINIBIG

Small packaging machines for a thousand uses.

The economic desktop machines with high quality packaging.

**MINIMAJOR** and **MINIBIG** are the long tested economic models of the Quick Pack shrinkwrapping range of machines, born to meet the packaging requirements of small industrial productions that do not need a bigger and much more expensive packing machine.

Quick and silent, **MINIMAJOR** and **MINIBIG** are able to grant professional quality packaging with most of the shrink films available on the market (PVC and the "green films" MEC92, PP) with low consumption and profitable costs, suitable to anyone, still being strong and long lasting, as any other Quick Pack range product.

**MINIMAJOR** and **MINIBIG** can also cut and seal any plastic films (PVC and the "green films" MEC92, PP, bubble films). Furthermore, they all request a really minimum and easy maintenance, and they are equipped with some exclusive security systems: a special self-limiting device and a double thermostat safety with alarm buzzer, in order to reduce the requests for specialized technical assistance.

Finally, the new optional trolley, with its functional design and additional support, is built to keep the extra film rolls always together with the machine, in order to enable minimum wasted space and really best practicality, without any problem of stocking area for the film at all. Everything at the most competitive Quick Pack prices!

**Economic, handy, easy to use, long lasting, only 1 kW of power consumption!**
